

84 years, Cancer patient, bedridden for 2 months, poor nutritional status

All ulcers in the coccyx area were treated with a single **MOMOSAN** white dressing in connection with NPWT („THEISIS“).

before

after

After a further 8 days, the wound bed had been cleansed very well due to the excellent exudate management.

Summary:

Considering the treatment of patients in very critical states, the result is to be considered outstanding.

MOMOSAN white and **MOMOSAN** black are ideally suited for achieving best results in connection with NPWT systems.

MOMOSAN[®]

Application report with NPWT
