

## PROTECTIVE COVERS

**JERSEY:** Cotton stretch fabric, colour: medium blue

**PUNL® system cover:** The specially manufactured, polyurethane-lined fabric on warp ware, bi-elastic without formation of microcreases results in additional pressure relief to prevent decubitus. The PUNL® fabric is washable and practically impermeable for blood, secretion, infusion solutions and urine, yet still breathable and vapour-permeable, thus protecting against macerations of the skin caused by heat and moisture build-up.

PUNL® is not irritating in line with ANNEX VI, anti-bacterial, anti-mycotic and anti-microbial, mite-proof, free of PVC and CFC, flame retardant, colour: aquamarine, approx. 250g/m<sup>2</sup>.

**designs:** Standard PUNL® „SB“ aquamarine. For surgery antistatic PUNL® „TC12“ black. For x-ray imaging: with velcro fastener instead of zipper.

**Cotton cover:** for wheelchair pillows in black standard, wheelchair and bedding pillows available in many colourful variants on request, removable with zipper
